The TOOLS4BRAIN project is co-financed by the Erasmus + program of the European Union. The content of this application is the sole responsibility of the project partners and neither the European Union nor the Spanish Service for the Internationalization of Education (SEPIE) is responsible for the use that may be made of the information disclosed here.

The project "**TOOLS4BRAIN: Providing training and policy resource for well-prepared formal and informal caregivers of brain-injured patients in Europe**" granted in September 2017 by the European Union within the **Erasmus + program. Cooperation for Innovation and the Exchange for Good practices | Strategic partnership for adult Education** aims to develop an app and A manual of good practices for the care of people with Acquired Brain Damage, in different languages.

Under the umbrella of this European programme, **NEURORHB** (Neurorrehabilitation Service of Vithas Hospitals) has developed a free app for smartphones and tablet with advices and action guidelines to take care of the person with acquired brain damage and improving the family environment. Furthermore, entities such as **FEDACE** (in representation to people with DCA in Spain), **NOVAMENTE** (affected people in Portugal) and **BOSEV** (representing Turkey) have collaborated and counselled NEURORHB.

WHAT CAN YOU FIND IN THE FIRST EUROPEAN APP FOR PEOPLE WITH BRAIN DAMAGE?

ADVICE AND ACTION GUIDELINESS TO TAKE CARE OF AFFECTED PEOPLE.

The application of **NEURORHB** provides detailed information about:

- mobility
- cognition
- behaviour and emotion
- communication
- food
- daily activities
- environment adaptation
- medical care
- social resources
- family

Within these categories you will find **accessible, simple and precise advice and action guidelines to take care of your relative.**

All of them include content, images and videos that will help you to live together with brain damage.

PERSONALIZED INFORMATION

In an easy and useable way, anyone who downloads the brain damage app can obtain advice and personalized guidelines by only filling a short form.

To obtain personalized information, register and answer the test questions. All the advice and recommendations would be personalized for your case. In addition, you can modify the form questions as many times as necessary, with the aim that the information would be always adapted for the situation of your relative.

HOW TO USE THE APP?

You can enter the main menu pressing the **top button**, that gives access to the different App sections.

Test

Test: To run the diagnostic test, answer the following questions. At the end, you will gain access to the related tips. Once completed, you can change your answers as many times as needed, just accessing this section.

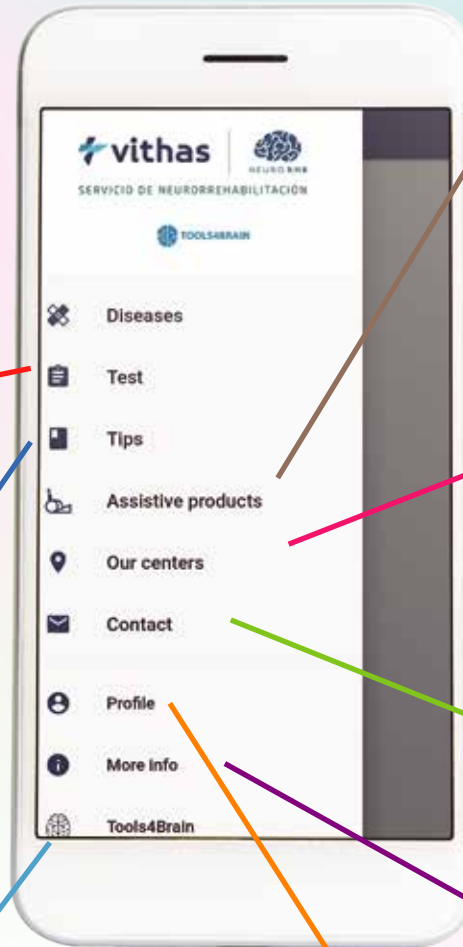

Tips

Tips: You can access the personalized contents clicking in the different areas.
